

I have been a subscriber of satellite radio for approximately six months and feel very strongly about continuing this service. It is an excellent alternative to regular radio and an excellent alternative for travelling. Many times, while in remote or isolated areas of the country, it is difficult to find preferred entertainment.

In the cable industry there are options available to customers such as satellite dish or regular cable. We have the choice of watching television, going to a movie, or renting DVD's etc. We, the customers, should have that option of deciding, especially if we are paying for the service, to decide what method of entertainment we desire.

The NBA should not be afraid of competition. That is the American way of business.

XM Radio provides an excellent alternative in listening enjoyment.
